

^{tiny} TITANS

dinosaur eggs and babies

*Come explore the extraordinary clues
that tell us how dinosaurs
raised their tiny titans...*

Embryo
model by
Brian Cooley

In association with Yale Peabody Museum of Natural History

Murals by Luis V. Rey

**Exhibit Size:
Flexible up to 4500 square feet**

with minimal storage requirements for unused components and empty containers.

The exhibition features an amazing collection of dinosaur eggs representing six different major groups of dinosaurs. All are brought to life with colorful paintings showing dinosaurs as parents and sculptures of babies ready to hatch. Video presentations and interpretive labels summarize the latest findings of dinosaur experts. Several new hands-on activities entertain all ages.

Photographs by Nicholas Register at Yale Peabody Museum of Natural History

"The excitement and suspense surrounding this exhibition make it easy to promote."

Ginger Keller-Ferguson, Development Specialist
ETSU Natural History Museum

- Over 70 authentic eggs from each of the major dinosaur groups
